

Hardwood Defoliation in South Carolina - 2004

Forest Health Aerial Survey for Defoliation - 2004(1)

County	Acres Defoliated(2)	Affected Areas	Primary Species Affected
Beaufort	450	New River	
Berkeley	14,080	Santee, Hell Hole, Four Hole	Gums, Bottomland Hardwoods
Charleston	19,200	Wambaw, Edisto	Gums, Bottomland Hardwoods
Colleton	38,400	Below Walterboro, Edisto	Gums, Bottomland Hardwoods
Darlington	8,960	Pee Dee	Gums, Bottomland Hardwoods
Dillon	15,360	Pee Dee	Gums, Bottomland Hardwoods
Dorchester	37,248	Great Cypress, Four Hole, Edisto R	Gums, Bottomland Hardwoods
Florence	28,160	Pee Dee	Gums, Bottomland Hardwoods
Georgetown	35,840	Pee Dee, Santee	Gums, Bottomland Hardwoods
Horry	89,600	Pee Dee, Waccamaw	Gums, Bottomland Hardwoods
Jasper	40,960	Great Swamp, Savannah	Gums, Bottomland Hardwoods
Marion	66,560	Pee Dee (both)	Gums, Bottomland Hardwoods
Orangeburg	15,360	Four Hole	Gums, Bottomland Hardwoods
Williamsburg	23,040	Santee, Pee Dee, Black	Gums, Bottomland Hardwoods
Total	433,218		

1. Most insect defoliation was by forest tent caterpillar, but cankerworms and others also reported.
2. Includes all observed defoliation of more than 50% of foliage on host trees where host trees comprised at least 50% of forest stand.
